## Grade 6 CCSS Skills

## Ratios and Proportional Relationships

$\qquad$ Understand ratio concepts and use ratio reasoning to solve problems
$\qquad$ Understand unit rate

## Number System

$\qquad$ Find a percent of a quantity
$\qquad$ Divide fractions by fractions
$\qquad$ Fluently compute with multi-digit numbers and multi-digit decimals
$\qquad$ Find common factors and multiples of numbers
$\qquad$ Find the greatest common factor and least common multiple of two whole numbers
$\qquad$ Use understanding of positive numbers to understand rational numbers
$\qquad$ Understand positive and negative integers and be able to locate on a four-quadrant coordinate plane
$\qquad$ Order rational numbers
$\qquad$ Understand absolute value
$\qquad$ Add and subtract integers
$\qquad$ Apply properties of operations to add and subtract rational numbers

## Expressions and Equations

$\qquad$ Use understanding of arithmetic to solve one variable equations and inequalities
$\qquad$ Write expressions and equations to describe real world situations using variables
$\qquad$ Write and solve equations with whole number exponents
$\qquad$ Write an inequality to describe a real world or mathematical problem
$\qquad$ Represent and explain relationships between dependent and independent variables

## Geometry

$\qquad$ Solve real world problems involving area, surface area, and volume
$\qquad$ Draw (freehand, with ruler and protractor and with technology) geometric shapes when given specific conditions
$\qquad$ Know the formulas for area and circumference of a circle
$\qquad$ Represent three-dimensional figures using nets made up of rectangles and triangles
$\qquad$ Find surface area using nets

## Statistics and Probability

$\qquad$ Ask a statistical question (How old are the students in my school?)
$\qquad$ Describe and summarize data by noticing the center, spread, and overall shape Display numerical data on a number line including dot plots, histograms, and box plot
$\qquad$ Use measures of center to summarize numerical data
